

# Found Pet

KC

**Breed:** Domestic Short Hair

**Gender:** Male

**Age:** Adult

**Reward:** no

**Location:** Asheville, 6 Saint Marys Lane

**Description:** UPDATE: HE HAS BEEN FOUND AND IS SAFE. THANK YOU!

Left to go exploring on Monday May 7th and hasn't returned. His chip # is 4A645B3A63 through HomeAgain. The information is current. He is a black short-haired domestic cat with a tiny speck of white on his side (I believe left side and like someone dropped paint on him) and under his chest. These are small marks and not noticeable until you are close to him or even holding him. He has a watery right eye as a result of a respiratory infection as a kitten (not contagious or ill). He can see, but vision isn't his strong suit. Healthy. Curious, playful and friendly. Loves other animals. Born approx May 2009. He is approximately 8 lbs and healthy. We miss him and can't wait to see him again soon!
